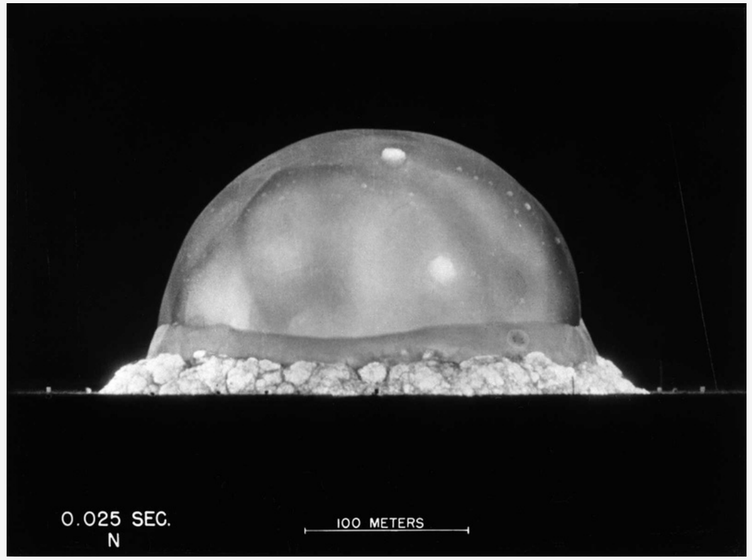
Margaret Lund, PhD

Nevada National Security Site (NNSS)

- Nuclear weapons science
- Environmental protection
- National security programs

Problem Introduction

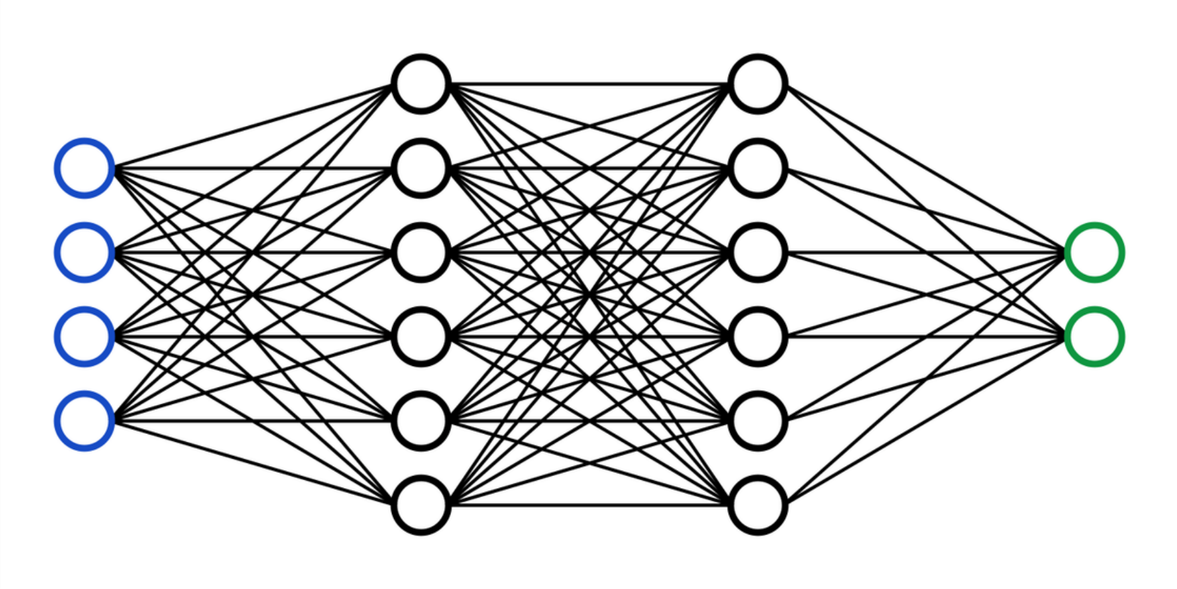
- Radiographic image analysis using convolutional neural networks

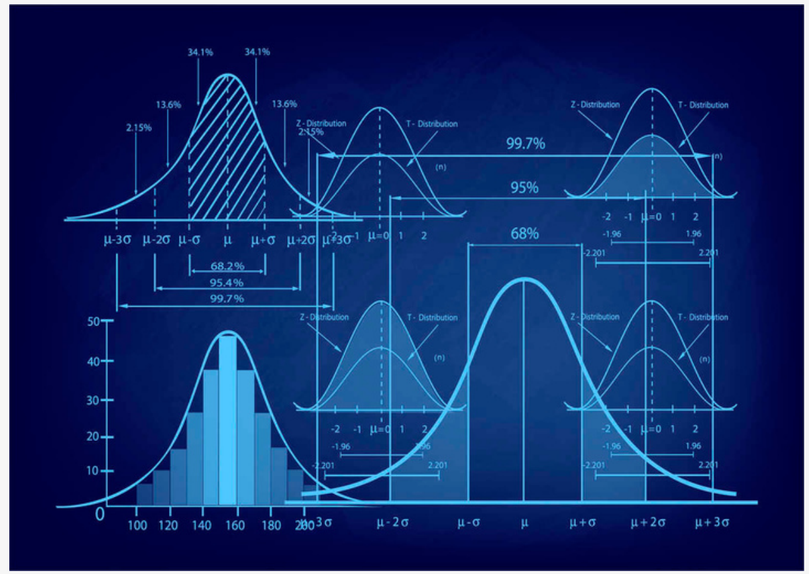


- Aids in NNSS tests analysis
  - National security
  - Nuclear stockpile safety

Project Scope

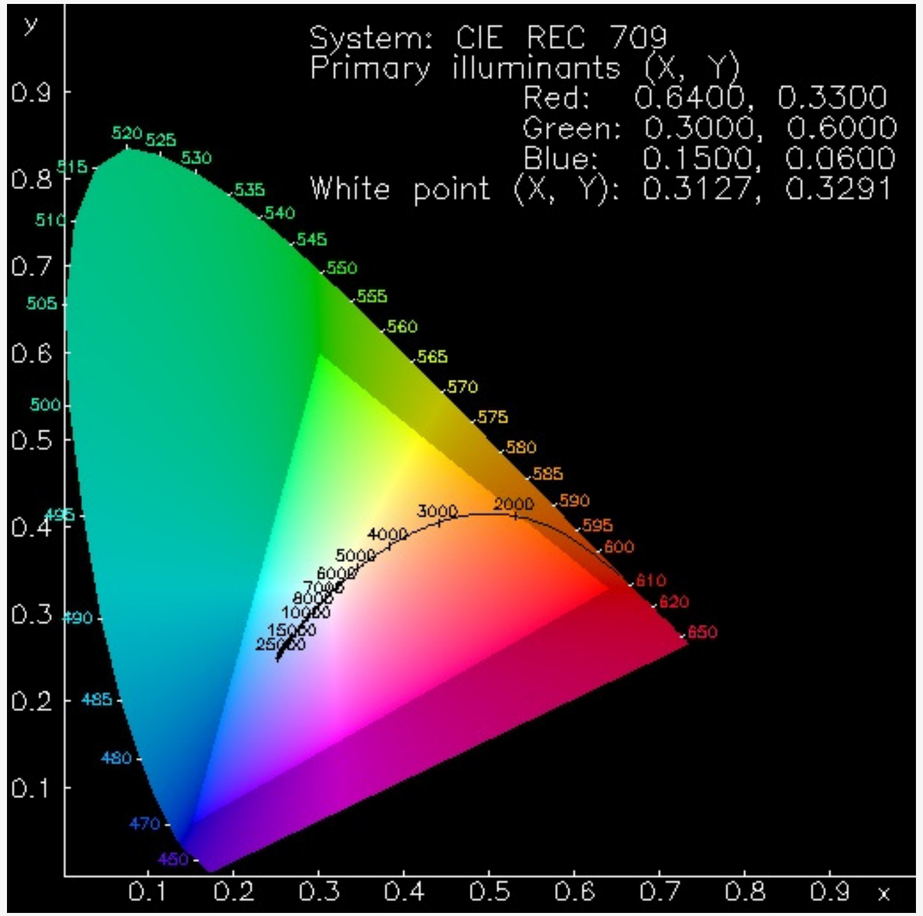
- Develop a network using Python and train it using image data
- Probability model and uncertainty quantification





Initial Strategy

- Decide if regression or categorical
- Convolutional or regular neural network
- Spectra or specific metal

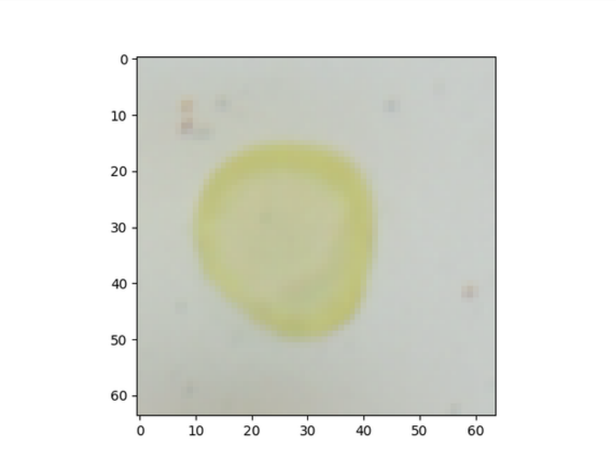


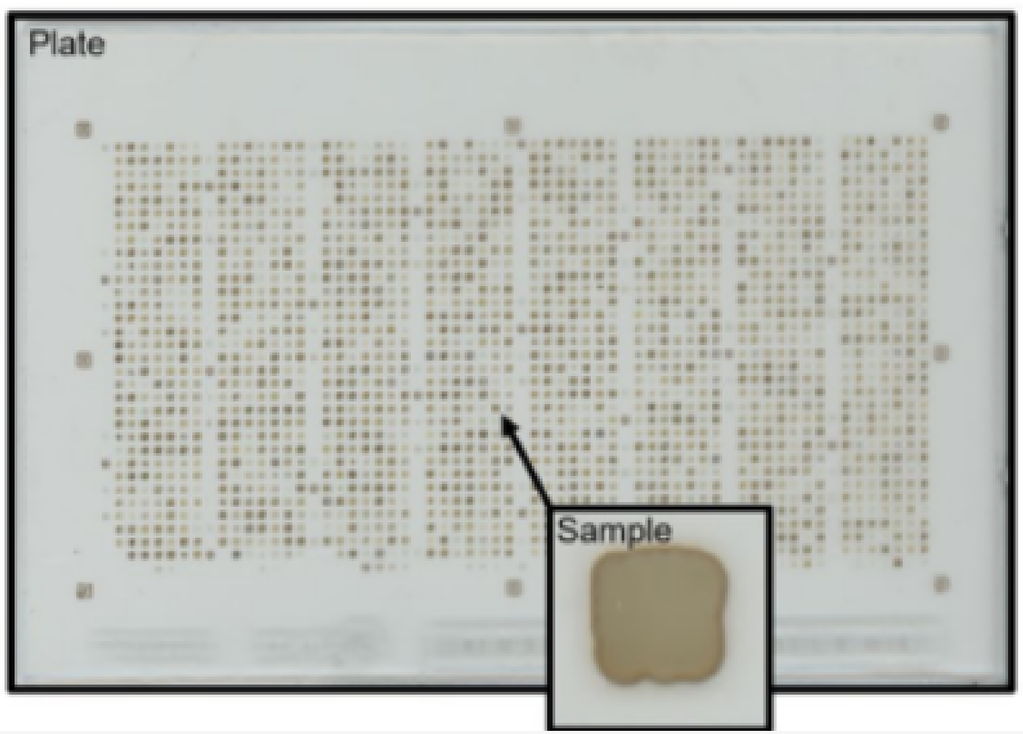
Dataset: Absorption spectroscopy data for 179072 metal oxides

Image size: (64, 64, 3, 180902)

Channel values: RGB

Normalized: 0-1 for every channel





Stein, H. S., Soedarmadji, E., Newhouse, P. F., Guevarra, D. & Gregoire, J. M. Synthesis, optical imaging, and absorption spectroscopy data for 179072 metal oxides https://doi.org/10.6084/m9.fgshare.7502207 (2019).

Output

- Spectra
- Originally 220 values
- 20 values with linear interpolation between
